ABOUT US

Artemis Pool and Fountain Systems delivers comprehensive solutions-from project development and consultancy to installation and after-sales support-for swimming pools, aquaparks, saunas, steam rooms, and Turkish baths.

Leveraging years of experience, we combine high-quality, aesthetic, and standards-compliant designs to strengthen our industry position. Our expertise spans Olympic, therapy, children's water play, ornamental, and waterfall systems, where we provide turnkey implementation.

Committed to continuous improvement and ethical standards, we adopt a people- and environment-oriented approach to develop innovative projects using modern technology that meets international requirements.

*"We design with intention. We build with precision.
We deliver for a lifetime."*

WHAT DO WE DO?

CONSULTANCY

We begin by understanding your vision and requirements, offering expert advice and technical consultation to ensure the best solutions for your project.

DESIGN

Our team creates innovative and functional designs tailored to your needs, combining aesthetics with engineering excellence for outstanding results.

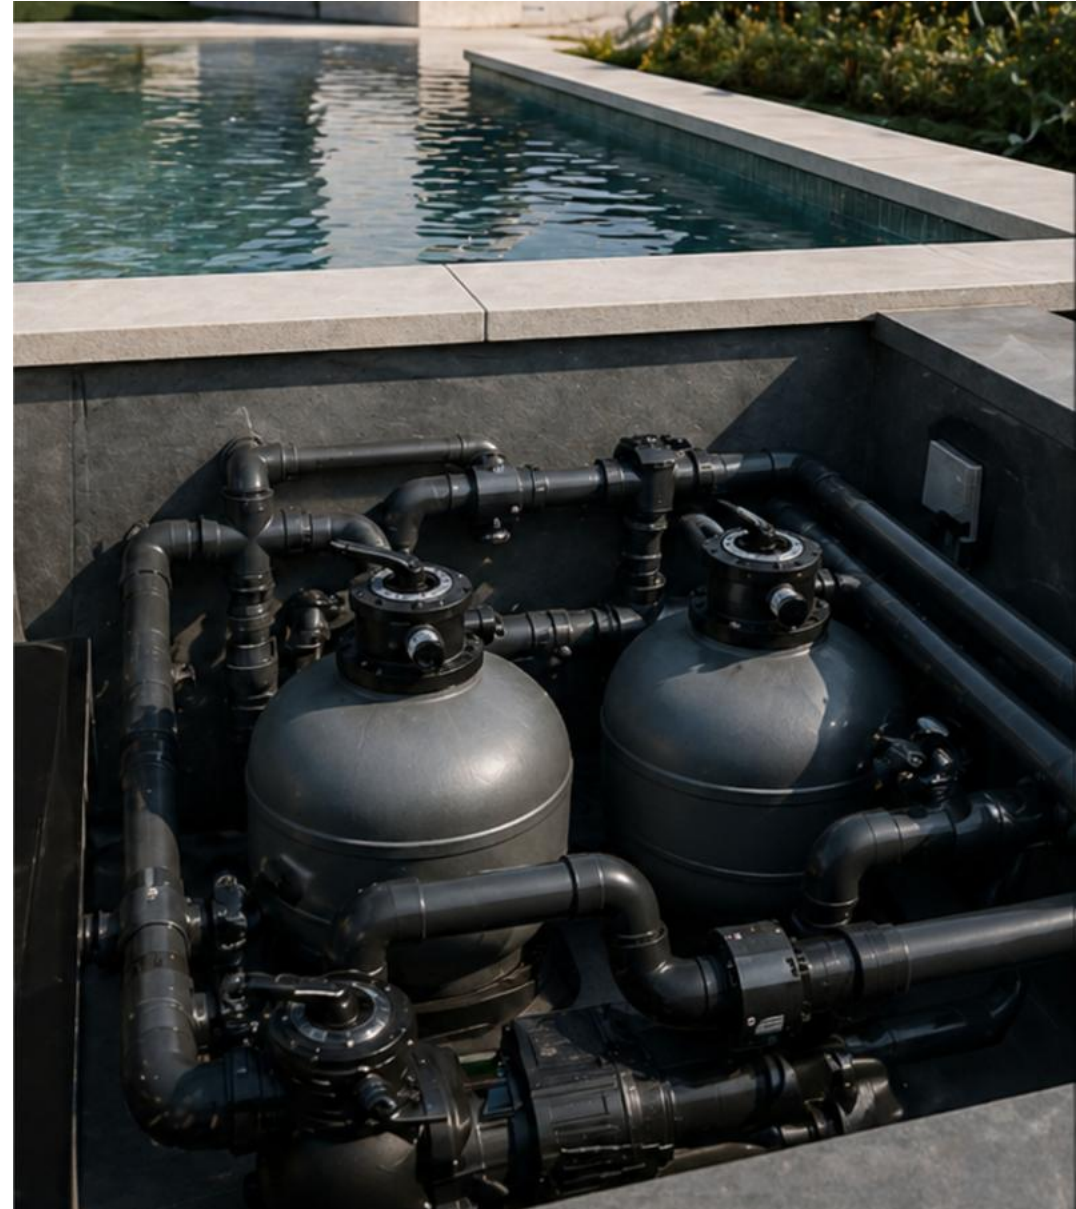

TURNKEY IMPLEMENTATION

We manage the entire construction process with precision and care, using premium materials and advanced techniques to bring your project to life.

AFTER-SALE

Our commitment continues long after completion. We provide reliable maintenance and support to ensure lasting performance and peace of mind.

OUR ACTIVITIES

We design, build, and maintain exceptional aquatic environments that enhance lifestyles and elevate spaces. Our expertise covers a wide range of solutions tailored to meet the unique needs of each project with precision, quality, and care.

- Swimming Pools
- Sports Pools
- Olympic Swimming Pools
- Diving Pools
- Scuba Diving Pools
- Synchronized Performance Pools
- Water Polo and Competition Pools
- Floor Air System
- Surface Fountain System
- Bulkhead / Headbulk
- Olympic Pool Accessories
- Scoreboard Systems

- Aquaparks
- Waterslide Pools
- Waterslide and Installation Systems
- Lazy River
- Wild River
- Wave & Surf Pools
- Ornamental Pools
- Natural & Biological Pools
- Pond and Landscape Pools
- Streams and Waterways
- Therapy & Rehabilitation Pools
- Massage & Thermal Pools

- Fountain and Dry Deck Pools
- Urban Square Play & Decorative Pools
- Filtration Systems
- Bubble Wall Water Features
- Animation & Show Pools
- Waterfalls & Artificial Rock Pools
- Sauna & Steam Room
- Turkish Bath (Hammam)
- Prefabricated Pools
- Fine Construction Works Inside Pools
- Ceramic & Mosaic Coating
- Insulation, Plastering and Screed Works

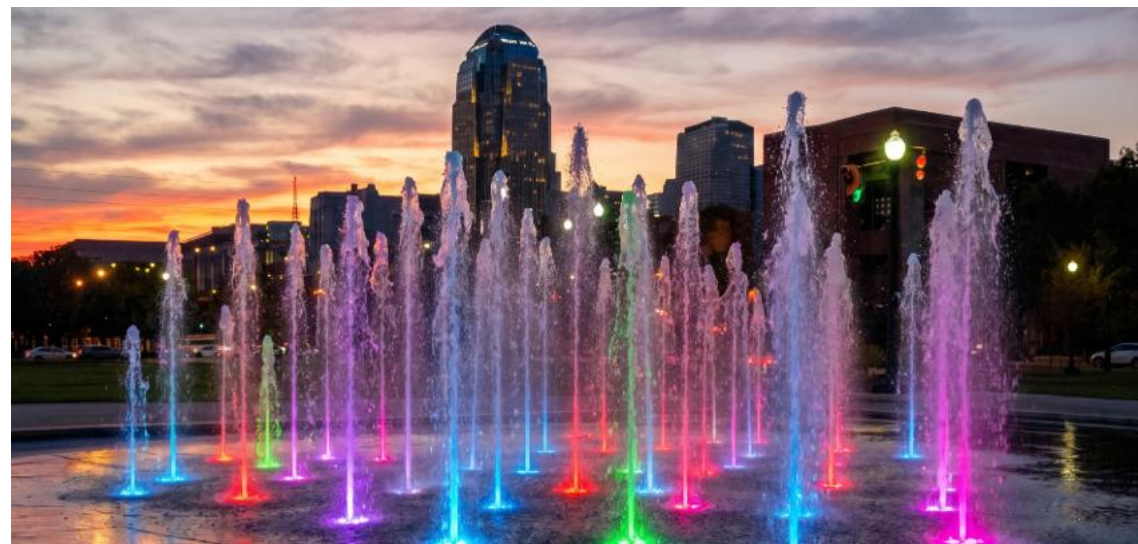

FOUNTAIN POOLS

Fountain pool projects offer a wide range of design options tailored to the characteristics of each space. Incorporating diverse architectural elements, these pools can be designed to complement the identity of the structure. With the right equipment, visually striking fountain systems can be created. Fountain pools can be built in any size and visual concept, suitable for all types of spaces. This field requires expertise in design, engineering, and project execution, supported by experience and technical knowledge.

DRY FOUNTAINS

Dry fountains highlight the calming effect of water while adding value to spaces independently of architectural design. These systems, which can incorporate various architectural details, are designed in harmony with the characteristics of the space. With equipment suitable for every style and decorative need, dry fountains can be implemented to enhance any environment.

FIBERGLASS POOLS

Fiberglass pools offer a more economical and advantageous alternative compared to concrete and other traditional pool types. Manufactured from a combination of glass fiber and polyester materials, these pools are highly durable and long-lasting. They provide a variety of design options suitable for all types of spaces and feature a fast installation process.

Fiberglass material offers up to four times greater tensile strength compared to steel.

Its flexible structure ensures durability underground, remaining unaffected by soil

movement and pressure.
Service life of up to 50 years.

Lower installation cost compared to other pool types.

Fast installation process: The pool shell and equipment room are placed using a crane, followed by system installation.

5-year warranty on the fiberglass structure and 2-year warranty on mechanical systems.

Resistant to cracking and leakage.

Enhances user experience with its aesthetic appearance and design flexibility.

Low maintenance and operating costs; resistant to algae formation and antibacterial.

OLYMPIC POOLS

Olympic swimming pools are facilities designed for training and competitive use worldwide. Built in accordance with FINA standards, they are suitable for hosting both national and international swimming competitions.

Filtration and disinfection systems must comply with TS13661 standards.

Pool dimensions, materials, and equipment brands must conform to FINA regulations.

Competition areas can accommodate events such as freestyle, breaststroke, backstroke, butterfly, synchronized swimming, as well as water polo and diving competitions.

Accessories such as diving platforms and turning panels are included.

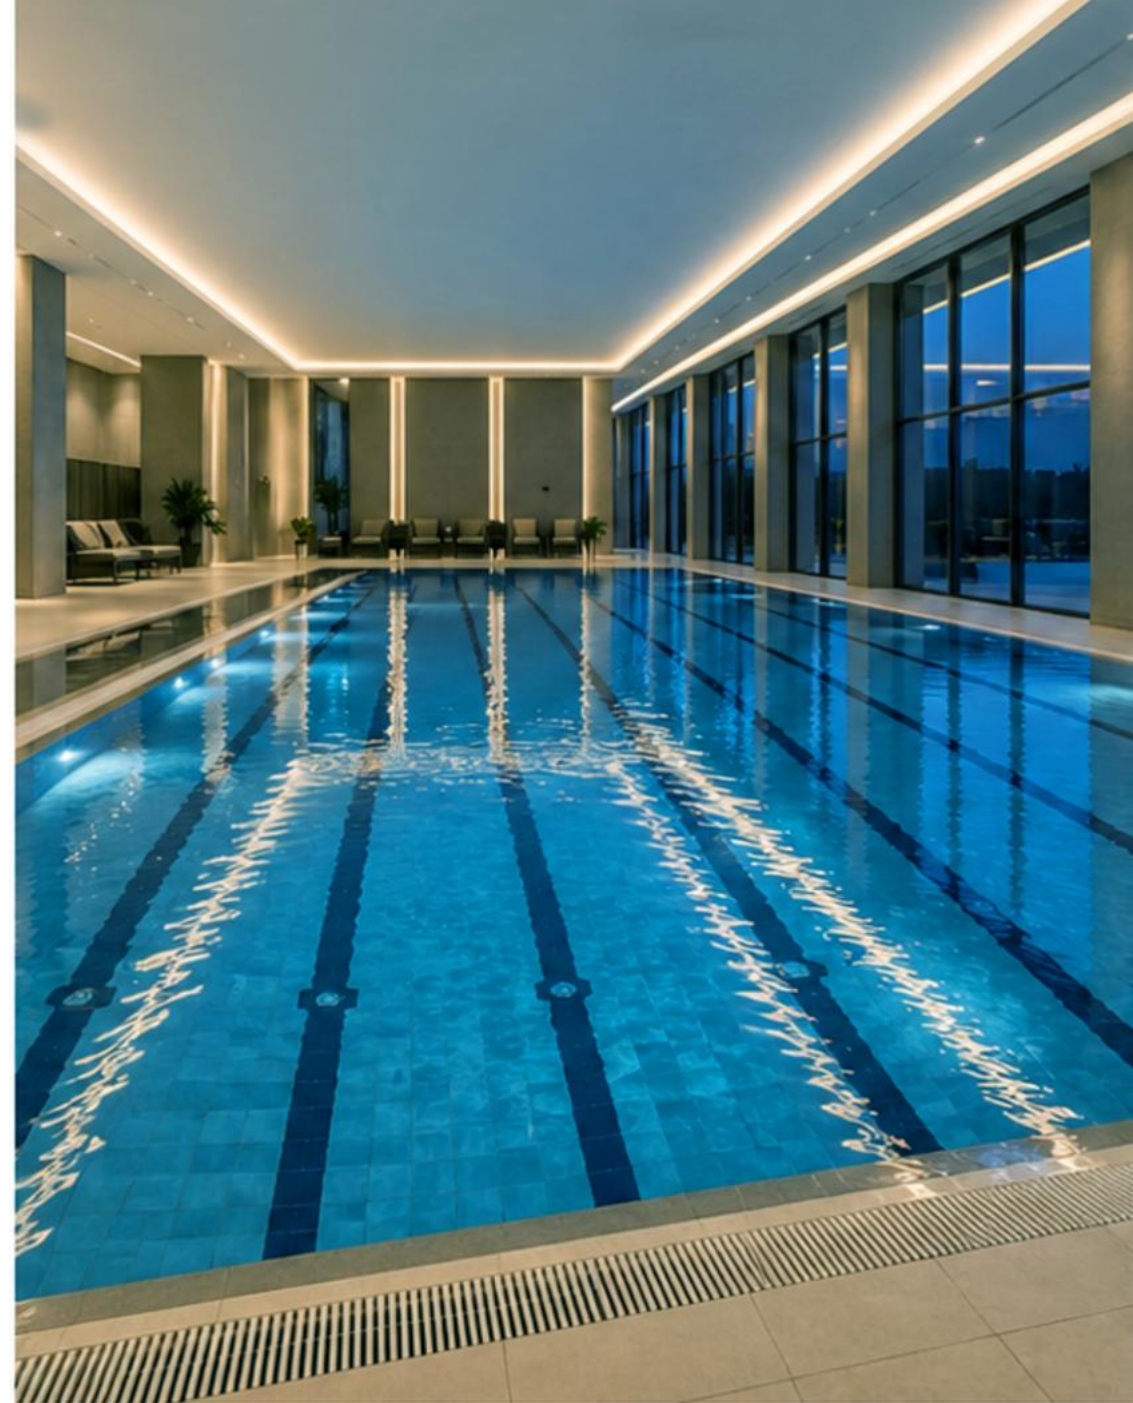

Full Olympic pools are 50 meters in length, while short-course pools are 25 meters long.

POOL AUTOMATION SYSTEMS

Pool automation systems modernize traditional maintenance methods, which are often time-consuming and require constant attention, providing pool owners with significant savings in both time and energy. These systems continuously monitor water quality and automatically perform critical operations to ensure optimal performance.

With the ability to control various components, users can systematically manage processes such as filtration, disinfection, and chemical dosing. Offering remote access capabilities, these systems allow users to easily monitor and control operation and maintenance processes. Pool automation systems ensure clean, safe, and enjoyable usage while maintaining consistent water quality at all times.

SCOREBOARD SYSTEMS

Our timing systems, designed for Olympic pools, provide professional solutions that accurately measure athletes' performance and record results on scoreboards. Certified with CE standards, our products operate with precision verified by TÜBİTAK UME, ensuring zero margin of error.

Protect athletes' rights and record competition data flawlessly with our advanced systems.

Compatible scoreboards for water polo are also available. Additionally, our swimming scoreboards can be easily adapted for water polo use. Our systems are supplied together with 30-second shot clock devices.

Join us for perfect timing and accurate data recording in professional competitions.

TURKISH BATH

The Turkish bath helps reduce daily stress, relax the body, and provide deep rest. It relieves muscle tension and supports the lymphatic system. With regular sessions, it promotes clean and healthy skin, leaving you feeling refreshed and rejuvenated. Experience relaxation through the traditional touch of the Turkish bath.

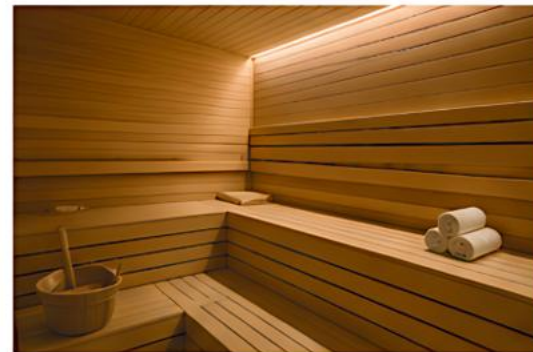

SAUNA

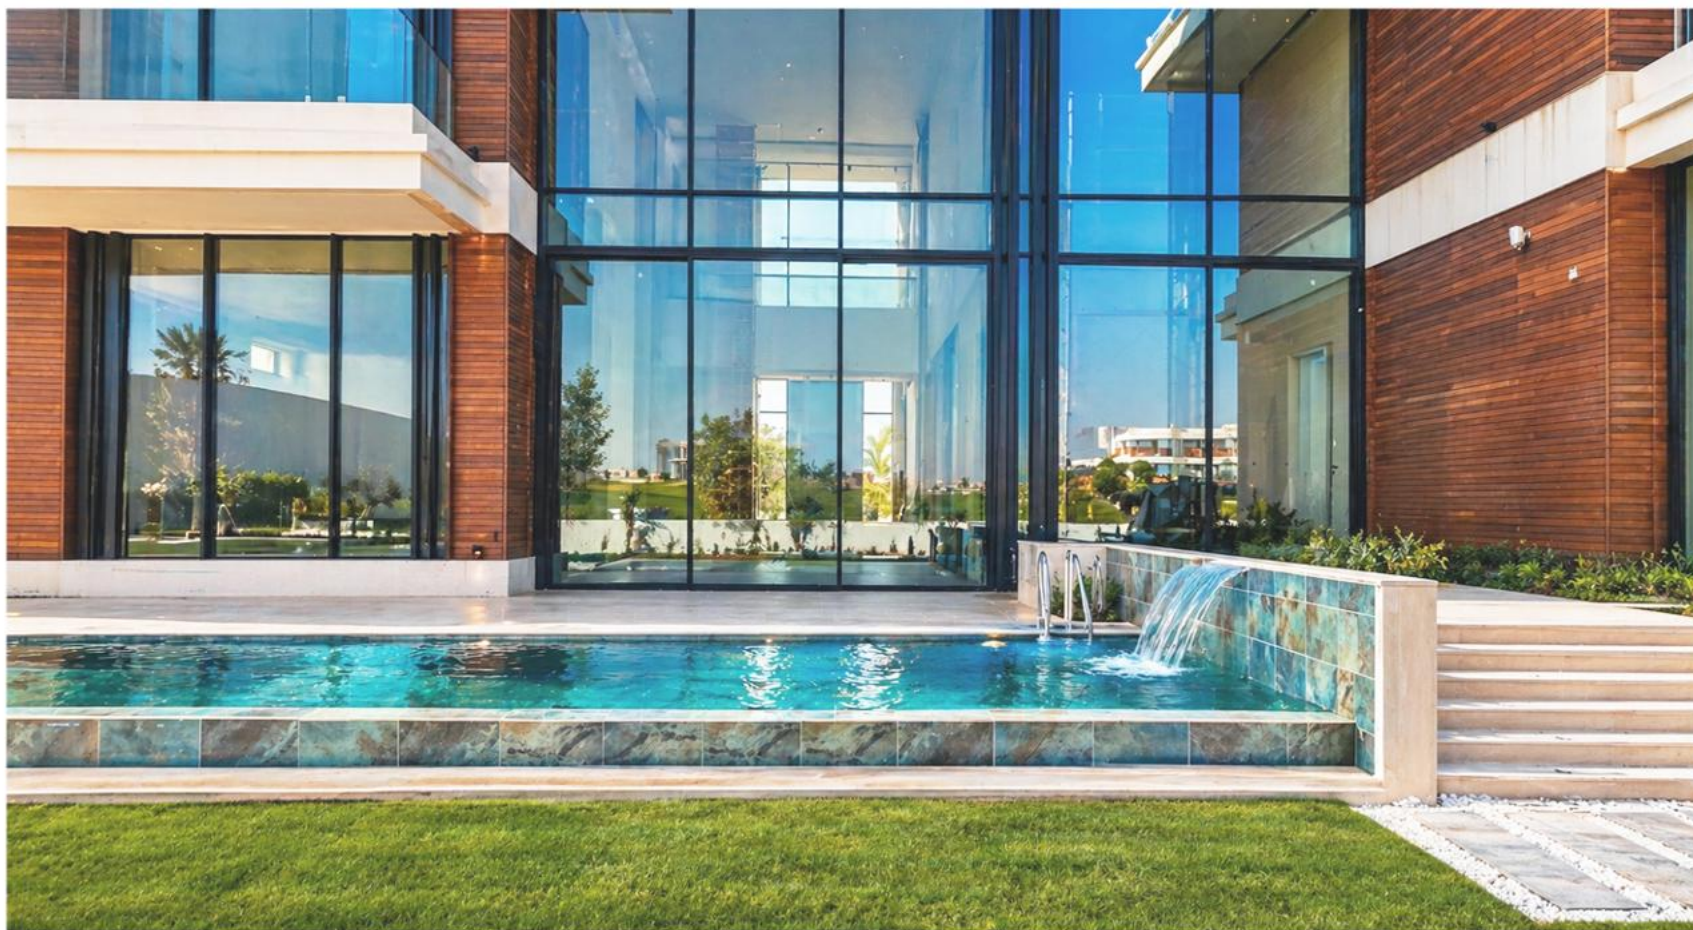

Relieve the fatigue of daily life with just a 15-minute session at 90°C. Your pores open, blood circulation accelerates, and you achieve healthier skin and a revitalized body.

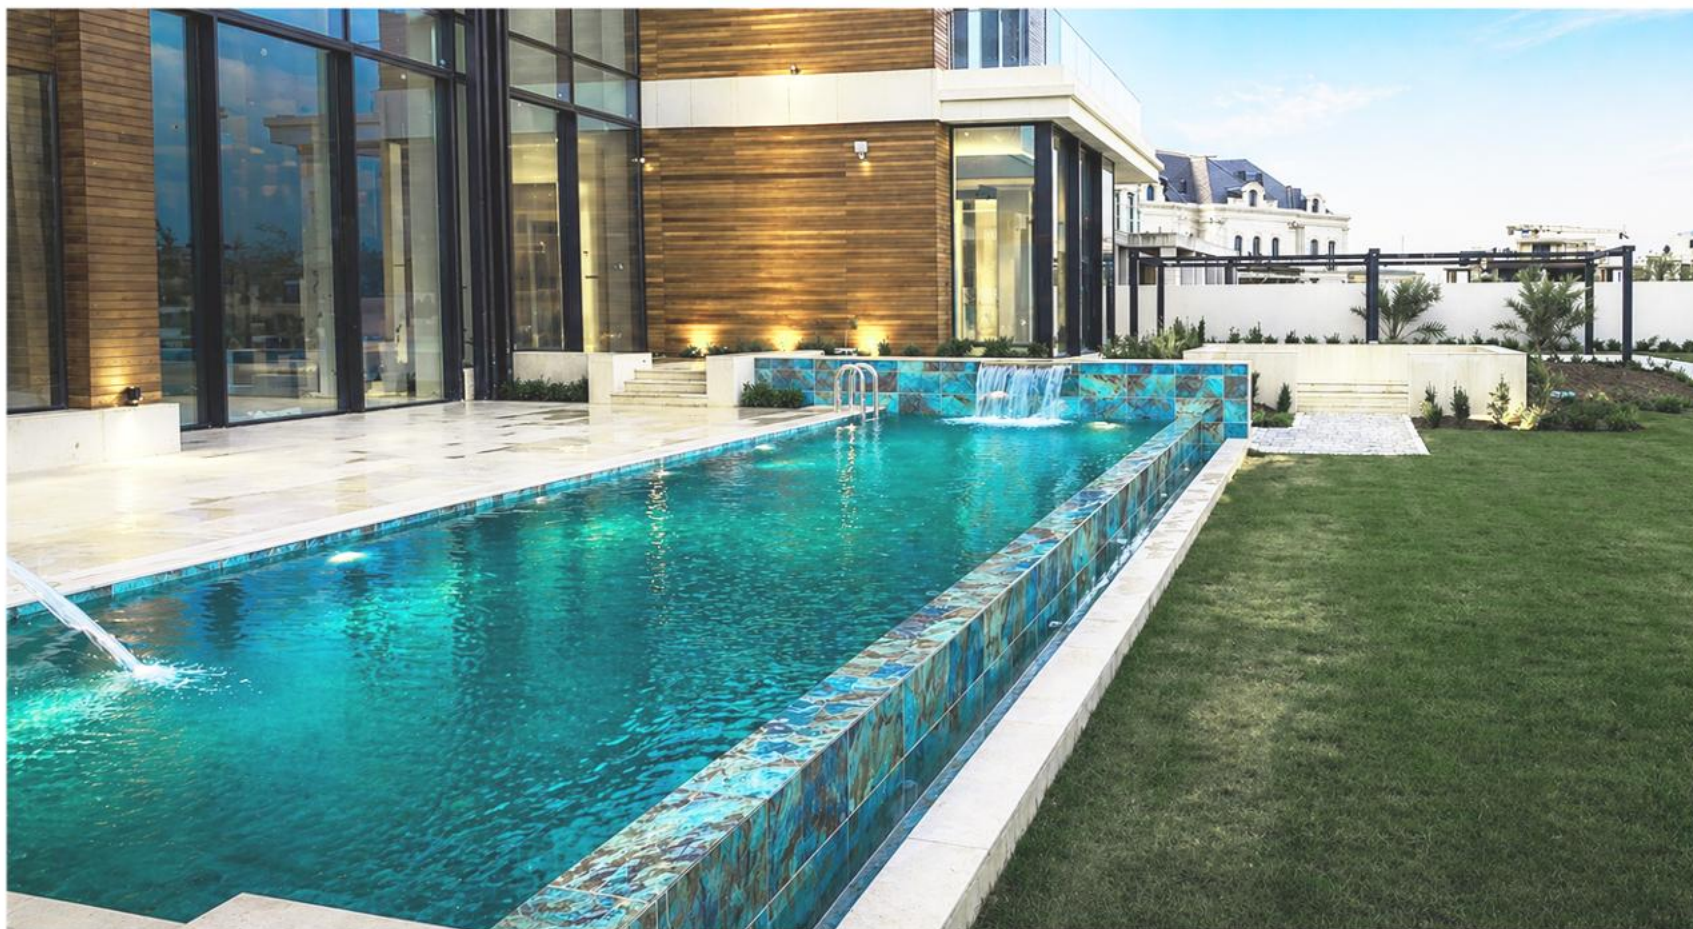

STEAM ROOM

Relax at 45°C with high humidity. Steam gently massages your skin, improves blood circulation, and offers one of the most enjoyable and refreshing bathing experiences.
